

## Levingston – Providing Technical Services since August 1, 1961

Join us in celebrating another successful year of operation for Levingston Group, LLC. It has been **63 years** since Ernest Levingston started Ernest Levingston and Associates, Inc, performing the first job for Olin Mathieson. We have evolved from a one-man operation to a professional organization employing 360.

Again, this year, a mention of gratitude is certainly owed to all of you that make Levingston successful as a quality service organization. Thank you for your continued commitment to providing quality services to our clients day in and day out.

Success of any service company requires commitment to meeting our clients' needs as relates to job tasks, budgets, and schedules. We find these days that it's easy for anyone to promise these needs with words, but we all know that our actions mean more than any words we use. Our actions determine our integrity. Thank you all for your actions, truly showing right ordered priorities each and every day we offer our services to others, remembering to keep God first, family next, then our job responsibilities.

Those attributes are true measures of success.

Thank you for all you do and God bless.

Mark and Dan
